Subject: Re: TAV Records and Data Update and Discussion

Brooke,

We interpreted “associated with the operations” meant related to the physical work at the facility of receiving recyclable material. The locations listed on the response for Item #1 are all suppliers of recyclable materials for operations conducted at the TAV 3311 Empire Blvd SW, Atlanta, GA facility. Most of these locations are only a supply source to TAV and a few of these sources are part of joint-venture entities with TAV. I can distinguish which facilities are independent and which are part of JV’s.

The original address for TAV was 111 Hollow Tree Lane, Atlanta, GA. Following the purchase of the 3311 Empire Blvd SW property adjacent to the 111 Hollow Tree Lane property, the official address for the business was changed. Later, the purchase of the property 3405 Empire Blvd SW, Atlanta, GA was added to support the TAV Atlanta operations. It is located across the street from the main plant. The 3405 facility primarily is a storage lot for materials and equipment. The facility located at 56 Jarrell Road, Greenville, GA is a ASR processing facility that creates both concentrated materials which can either be sold as is or moved to the Atlanta processing facility for final processing depending on the grade of material. I am not aware of a TAV location in North Carolina.

If you would like to schedule a call this week to review some of the details, I am available to answer as many questions as I can. Thank you, Bob

Mr. Brewer,

The first item of the Request for Information states:

1. “Please list each location in the United States, which is associated with the operations of TAV. For each location describe the processes and operations conducted at the location.”

Can you please explain how these facilities are related to the operations of TAV? This questions is intended to identify all locations in the United States that are operated by TAV, or associated with TAV’s operations. For example TAV operates the facility at 111 Hollow Tree Lane, Atlanta GA, and the Facility at 3405 Empire Blvd, Atlanta Ga. We know there is another facility in Greenville, GA, Meriweather County and another in North Carolina. None of these facilities are listed in TAV’s Response.

Thanks,

Brooke

Subject: Re: TAV Records and Data Update and Discussion

Brooke, See attached updated information as requested. We will have the link updated by the end of the day. Also, regarding some other questions you posed last Friday PM:

1. The 3rd party test reports or TCLP analysis that Mr. Valerio referred to you during your last visit where you spoke with him were presented to you by Mr. Valerio during that discussion. If you want these reports added to the link, I will do so. Additionally, Mr. Valerio told me that there are no additional 3rd party reports. If you need to speak with me to clarify specifically what you are seeking, please let me know.
2. Regarding the absence of sampling results for metals after the date of 11/2020, I have not been able to confirm that this information is missing. When reviewing the data on the link, TAV was able to find information between 11/2020 and 10/2021. See attachment of screen shot. If we can assist with helping to identify this information, please let us know.

Thank you, Bob

Mr. Brewer,

Location should be defined as physical location. The expectation is the physical address or specific GPS coordinates.

Thanks,

Brooke York

Subject: Re: TAV Records and Data Update and Discussion

Brooke, Please see below an advanced copy of the supplement to the RFI for item #1. The link will be updated by the end of the day. We are working this afternoon to get you the answers to your questions regarding the "3rd party analysis or TCLP analysis,...and the sampling results for metals after 11/20/20." Thank you, Bob

Mr. Brewer,

Thank you for providing the response. I have completed an initial review of the response for completeness. In this initial review I noticed that no location has been provided in response to item 1. In response to item 3, 5 or 6, no 3rd party analysis or TCLP analysis has been provided (Mr. Valerio indicated that those have been conducted), and no sampling results for metals were provided for any samples since 11/2020. If I have overlooked this information I hope you will be kind enough to walk me through TAV's response and show/tell me where to find this information. Thank you for your time.

Thank you,

Brooke York

Brooke, TAV is working hard to collect the information requested and plans to have it by Thursday to send as directed. TAV is not planning to send anything early, but would like to keep the call on Tuesday on the calendar in case there are questions that may arise before the response is finalized. TAV is happy to go ahead and schedule something for the following week after you have had an opportunity to review the information collected in case any questions arise. Thank you, Bob Brewer

Mr. Valerio,

I am writing to touch based with you about the meeting tomorrow. I have not received any additional information from TAV. The due date for TAV's response to the Request for Information is this Thursday. Mr. Brewer has reached out to me. I am available to meet tomorrow afternoon if TAV has questions regarding the information or would like to go over some of the information together, as planned. Please confirm that is still the plan. If you have information that I need to familiarize myself with prior to the meeting please forward by tomorrow at 9 am. If this meeting is better postponed until next week please let me know and we can work out a time that works.

Thanks,

Brooke

Mr. Valerio,

Thank you for calling me today to discuss the records requested. I look forward to receiving the records and reviewing them in coordination with you. Please forward this invitation to anyone else I may have inadvertently omitted.

Thanks,

Brooke
